**On Saturday, July 14**, a Feed My Starving Children packing event will be held at Atonement beginning at 8:30 a.m. There are two things we are being asked to do: 1. Sign up to participate that day. There are three two-hour shifts. Jill will be available after both services to get you signed up. If you can't meet with Jill, she will have a card with a link to the website to sign up. 2. You're being asked to make a financial contribution to the event. It is the intent to pack 110,000 meals. It only costs .22 cents for each meal. There will be a "noisy" offering after each service in June so please empty your pockets. Your spare change could feed a hungry child for a day. Jill is also selling bracelets of hope for \$3 each.

If you have any questions, please contact Jill Gehner.

**Church Campout**—reserve your spaces now, if you haven't already, deadline has been extended to July 10! Details about the campout and reservations are on the KIOSK or in your last SCROLL.

Going to the potluck at the campout? Sign up on the KIOSK.

Questions? Contact Linda Beehn.

**VBS** flier invitations and registration forms are on the KIOSK. Take some to share with family, friends, neighbors...

## Thank you

*“...for I was hungry and you gave me food, I was thirsty and you gave me something to drink, I was a stranger and you welcomed me, I was naked and you gave me clothing ...”*  
*Matthew 25:35-36*

## Earth Care Note for June

**The focus this month is more global — rainforests.**

Of all the earth’s land, 13.7% or about 7.7 million miles is covered in rainforests. This includes parts of Brazil, Peru, Colombia, Venezuela, Ecuador, Bolivia, Guyana, Suriname, and French Guiana.

Deforestation of the rainforests is due in part to cattle ranching. The forest is razed to provide cattle pasture. Other reasons for this are mining, logging, and damming of the Amazon River.

Inhabitants of the rainforests, animals, plants, insects, and microorganisms are unique to this area. It is said there are millions of these that are yet to be discovered.

There are many benefits to preserving the rainforests besides preserving the environment. Plants found are used in 25% of prescription drugs and 1,300 of the known 2,000 cancer-fighting drugs come from these areas.

Governments are taking steps to control the deforestation but the process is slow.
